REMARKS

The above-identified errors in U.S. Patent No. 7,065,503 B2 incurred through the fault of the U.S. Patent and Trademark Office, and each of the identified errors are clearly disclosed in the records of the Office.

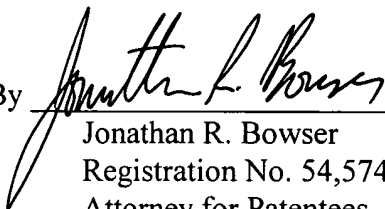

In particular, with regard to the title of the invention, the title printed on the Patent is the title of the corresponding international application, PCT/US01/00881, not the original title of the invention as listed in the original and substitute specifications and Declaration of Application Serial No. 09/936,610, for which U.S. Patent No. 7,065,503 issued.

Furthermore, the original title of the invention was correctly identified on the original filing receipt dated November 15, 2001, the corrected filing receipt dated May 19, 2004, and the Notice of Allowance dated March 7, 2006, as well as the Issue Fee Transmittal attached to the Notice of Allowance. The original title of the invention was not revised by the Patentees at any time during the prosecution of the application, and the title was not revised by an Examiner's Amendment. Therefore, the Patentees respectfully request that the Patent be corrected to include the original title of the invention.

Accordingly, this Request is submitted under the provisions of 37 C.F.R. § 1.322, and a Certificate of Correction should issue at no expense to Patentees.

Respectfully submitted,

Hideki MATSUSHIMA et al.
